

### Ultrasonic Fuel Level Sensor for fleet management

-----Fuel Monitoring System

## Ultrasonic Fuel Level Sensor

### Ultrasonic Fuel Sensor (Total Kits)

**Model: UL202**

Serial port Output: RS232(default)/RS485  
 Default Baud Rates:9600 (customized)  
 Analogue Output: 0~5V or 0~6V  
 Baud Rates: Default 9600 or Customized  
 Measuring Range: 1m(default) or 2m  
 Material: Any liquid, Diesel or Gasoline  
 Temperature of operation: -40 to 85°C  
 Resolution: 1~2 mm  
 Lowest Liquid Level Detection:5~6cm  
 Accuracy: 0.2mm (2%)  
 Max. Tank thickness: 8 mm  
 Max. Length of sensors cable: 15 meters  
 Power supply: 5~36V DC  
 Waterproof Design:  
 IP66 for detector, IP61 for controller box  
 Support Brands: Queclink, Calamp, Wireless Link, etc.

**FOB Shenzhen price**

<10pcs	USD 85
100+pcs	USD 79
500+pcs	USD 75
2meter version:	+USD15

### Repair/After Service Use ONLY

#### Diagnostic LED Screen Tool (each shipment will come with 1 unit)

**Model: UL202-LED**

**FOB Shenzhen price**

Unit price	USD 12
------------	--------

### Repair/After Service Use ONLY Detector with extended cable

**Model: UL202-D**

**FOB Shenzhen price**

Unit price	USD 32
------------	--------

**Remarks for installation:**

**Please be sure there is NO AIR between the detector and the fuel tank**

- a. Indoor Test: It's recommended to use couplant, which is similar as what doctors use for pregnant women check.
- b. Outdoor Installation in vehicles: It's recommended to use glue. Recommended brand is loctite380.
